

Spacenet Integrated Government Solutions (SIGS) delivers integrated end-to-end telecommunications solutions tailored to meet the unique mission-critical requirements of military, homeland security, intelligence and other government organizations.

SIGS leverages a strong history and culture of technical excellence, R&D and system integration capabilities providing vendor-agnostic, standards-based, interoperable and flexible solutions to meet the needs of our clients.

SIGS provides Managed Network Services in the U.S. and other parts of the world using an extensive network of secure and reliable teleports, and offers both pre-packaged subscription services and custom offerings tailored with the end user in mind so that they are free to focus on their core mission.

SIGS also specializes in the development and provision of low-profile, in-motion, 2-way satellite antenna systems. Our StealthRay™ low-profile satellite antenna systems provide government agencies with reliable SATCOM-On-The-Move (SOTM) capabilities to enable secure transfer of real-time Beyond Line-of-Sight information exchange between field and command locations.

A few examples of services from our portfolio of offerings include:

**Satellite Equipment and Services**

Fixed, Communications on the Pause (COTP) and Communications on the Move (COTM) satellite network solutions with either custom high speed data rates or pre-packaged speeds, CIR's and SLA's.

**Protected Emergency Communications Services (ECS)**

Information Assurance and Mission Assurance Category III (MAC III) ready services with AES 256 encryption capabilities to augment Spacenet's COTS ECS services to serve the needs of the military and homeland defense agencies.

Military-Grade broadband networking solutions that are ideal for both full-time and part-time services.

Part-time services for COOP and emergency response communications to facilitate coordination and collaboration and provide increased situational awareness, interoperability and real-time information exchange for military and civil authorities at Federal, State and Local levels.

**Integration**

Seamless integration of voice, video, encryption and acceleration services for both custom and pre-packaged offerings.

**Life-cycle Management**

Life-cycle management of various offerings that includes installation, warranty, logistics, 24x7x365 monitoring and maintenance.

**Professional Services**

Professional services that include complex design of terrestrial and satellite networks, application and bandwidth optimization, turnkey systems and network integration support.

**Spacenet Integrated Government Solutions**
